FOR IMMEDIATE RELEASE

MONTGOMERY JUDGE TO BE HONORED DURING MARYLAND STATE BAR MEETING

WASHINGTON, D.C. -- Judge Rosalyn Blake Bell, associate judge of the Circuit Court for Montgomery County, will be honored by the Maryland chapter of the George Washington Law Association during the Maryland State Bar Meeting in Ocean City on Thursday, June 12 at 8 p.m. Judge Bell will be presented with the association's professional achievement award by GW National Law Center Professor Robert E. Park. The award will be given during a reception held in the Captain's Quarters, Sheraton Fontainebleau Inn, 10100 Coastal Highway, Ocean City.

Since graduation from GW's law school in 1951, Judge Bell has served as a member of the Board of Governors of the Maryland State Bar Association and has lectured extensively in various continuing legal education programs. She became a judge for the District Court of Maryland, 6th Judicial District, in 1978, and associate judge of the Montgomery County Circuit Court this year.

MEMO TO: SCIENCE AND MEDICAL EDITORS

FROM: DIANE H. RUSH, NEWS MANAGER
(202) 676-6464 office
(202) 338-3497 home

The tendency of surgical implants to break under stress or to corrode has become an increasing problem because of implantations in young, active patients. Today an implant must be durable for 30 to 40 years, and nearly 150,000 implants are done each year.

The life of a surgical implant can be increased many times through proper heat treatment, according to new research conducted at George Washington University by professors Ashraf Imam and Charles Gilmore of the School of Engineering and Applied Science and Dr. Anna Fraker, metallurgist with the National Bureau of Standards.

According to Medical Devices Report, "They have found that the titanium alloy, Ti-6Al-4V, when treated in a 900° centigrade solution and then water-quenched, has its corrosion fatigue life increased twofold in a Hanks physiological (saline) solution (artificial body fluid solution) and tenfold in air. The heat treatment and other processing also increases the fatigue life of a cobalt chromium alloy (CoCr) often used today in permanent implants."

The research team has presented findings to the American Society for Testing and Materials, and Dr. Imam presented a paper at the Fourth International Conference on Titanium and Titanium Alloys in Kyoto, Japan (May 19-22).

DISTRICT JUDGE W. ERVIN JAMES TO SPEAK DURING STATE BAR CONVENTION

WASHINGTON, D.C. -- "The World Faces a Choice: Chaos and Tyranny or Rule of Law" is the subject of a speech by the Honorable W. Ervin James, judge for the 127th Judicial District in Houston, at a breakfast meeting during the State Bar of Texas Convention in Dallas, Friday, June 13. The meeting, sponsored by the George Washington Law Association, will be held at 7:30 a.m. in the Wedgewood Room of the Holiday Inn Downtown, 1015 Elm Street.

Judge James received his J.D. degree from the George Washington University law school in 1941. Prior to assuming his duties as District Judge, his career in public service included terms as assistant secretary of commerce and president of the Houston Legal Foundation.

FOR IMMEDIATE RELEASE

GW'S ALL-TERRAIN JAMES BOND MOBILE PLACES IN COMPETITION

WASHINGTON, D.C. -- Picture a small boat chugging through the water. As the boat nears shore it emerges to reveal four wheels, and it takes off down a dusty road in hot pursuit of the unknown.

No, it's not a James Bond vehicle. It's George Washington University's all-terrain vehicle, designed and built by five engineering students under Professor Roger Kaufman.

Recently the vehicle won fifth place out of 21 entries in the 1980 Mini Baja East Competition held at the University of Delaware.

GW's showing was particularly impressive since it was the only first-time entry to make the top winner's circle. According to Kaufman, most other schools had been refining and racing the same basic vehicle for two or three years. "Our vehicle was entirely

more

page two of two

designed, built and raced as an extracurricular project," says Kaufman, "while most other schools had students working on the Mini Baja vehicle as a formal course, sometimes with 70 or 80 students assisting. They received academic credit and were aided by professional machinists, extensive shop facilities and generous budgets. Some schools spent \$3-4,000. Our vehicle cost only \$750."

The purpose of the competition is to introduce engineering students to practical industrial design by having them design and build a one-man all-terrain vehicle to be judged on safety, appearance, design, cost and performance. Among the performance tests are acceleration, land maneuverability through rough terrain, deep water maneuverability, a draw-bar pull test and a 15-lap two-hour endurance race through mud, water, sand, rough terrain and a twisting rally-type course. GW's vehicle came in second in the 15-lap endurance run which was the main measure of over-all vehicle performance.

FOR IMMEDIATE RELEASE

GW CAPITOL HILL INTERNS STUDY WOMEN AND PUBLIC POLICY

The first congressional interns in George Washington University's Women's Studies Program have been selected and will begin working on Capitol Hill in September on public policy as it affects women. According to GW's Women's Studies Program and the Women's Research and Education Institute of the Congresswomen's Caucus, the eleven interns will work in a diverse group of congressional offices ranging from that of Sen. Nancy Kassebaum (R-Kan.), the sole senator in the Congresswomen's Caucus, to the office of the Subcommittee on Health of the House Committee on Interstate and Foreign Commerce.

In a program funded for three years by a \$300,000 grant from the Charles H. Revson Foundation of New York, the interns will conduct research to increase information available to Congress for making decisions affecting both women and men and will get first-hand experience in public policy-making. Funds for two additional interns from Howard University have been provided by the Phillip Morris Company and R. J. Reynolds. Interns will begin their one-year assignments on Capitol Hill in September 1980, following orientation at GW that includes a course in "Women and Public Policy."

more

page two - congressional interns

Interns receive graduate course credit for their policy and legislative research on the Hill and meet weekly to exchange information and discuss their work with experts from Congress, the executive agencies, business and women's organizations.

Interns were selected on the basis of academic performance, experience with local and community groups and interest in the analysis of gender differences as they affect public policy formation. In addition, academic and political backgrounds were matched with research needs formulated by members of the Congresswomen's Caucus. As a result, congressional offices have a unique resource added to their regular staffs.

Interns and their assignments follow:

-Rita Bryce, a business and government relations graduate who organized Common Cause chapters in her home state of Alabama, will work for Rep. Margaret Heckler (R-Mass.) on women's treatment under Social Security and private pension systems.

-Susan Coyle, former legal secretary and current Ph.D. candidate in sociology, will work in the office of Rep. Elizabeth Holtzman (D-N.Y.) on minority issues.

-Deborah Doolittle, a University of Colorado at Boulder graduate who is interested in foreign affairs, will work for Rep. Patricia Schroeder (D-Colo.) on the role of women in military service.

-Gail Duckworth, a Kentuckian who catalogued homemakers' rights for the National Organization for Women while studying at the University of Kentucky, will work for Rep. John Burton's (D-Calif.) Subcommittee on Retirement Income, which is developing a Homemakers' Bill of Rights to recognize homemakers' economic contributions to the family.

more

page three-congressional interns

-Chai Feldblum, an ancient studies major at Barnard College who has worked for the past year on population planning for the the Population Resource Center, will be assigned to the House Health Subcommittee with Rep. Bob Eckhardt (D-Texas).

-Susan Flaherty, a recent graduate of GW's National Law Center, will expand her interest in tax laws affecting child care to consider how the federal budget design aids or hinders women, a topic of concern to Sen. Nancy Kassebaum.

-Avery Gordon of Miami, who studied international relations at Georgetown University and paid her college tuition by working as a typist, will be looking at women's employment problems for Rep. Geraldine Ferraro (D-N.Y.).

-Carolyn Head, an activist who helped found the Montgomery County, Maryland shelter for abused women, will work on national legislation for programs to aid abused spouses for Rep. Barbara Mikulski (D-MD.), a leading advocate of services for abused spouses.

-Bonnie Ohmann, who interviewed aging Americans in upstate New York as part of a research project at the State University of New York, will pursue her interest in older women's incomes and health in the office of Rep. Rose Oakar (D-Ohio), who has introduced a number of bills to improve the incomes of America's poorest citizens, women over 65.

-Susan Sundberg, a chemistry major from the University of Nebraska, will work on Sen. Edward Kennedy's Judiciary Committee, using her science knowledge to assess occupational hazards that may affect women and men differently.

-Jacque Wurzelbacher, a mother of three young children, will work with Rep. Gladys Spellman (D-MD.), to assess the adequacy of current legislation on child support payments.

FOR IMMEDIATE RELEASE

THIRTY GRADUATED FROM GW'S COOPERATIVE EMPLOYMENT AND TRAINING PROGRAM

WASHINGTON, D.C. -- Thirty Washington area residents who have completed George Washington University's Cooperative Employment and Training Program received certificates at a commencement ceremony recently.

Eighteen persons completed training as biomedical equipment technicians, and 12 as business machine service technicians. Commencement speaker was Jack Mansfield, retired director of GW's Continuing Engineering Education program.

This project, funded through the DC/CETA program and administered through GW's School of Engineering and Applied Science, is designed to train the unemployed and underemployed for jobs in new and emerging occupations. The program is in its second year. A survey of Washington area hospitals, private firms and government agencies initially determined occupations with growth potential. Training for these jobs was conducted in a work-study format, with students alternating between semesters of on-campus classroom instruction at GW and of paid on-the-job training with local area employers.

Dear Mr. Piantadosi:

A few months ago, Robin Groom indicated to me you might be interested in doing a feature story about one of our professors who has the unusual hobby of collecting buttons.

Stefan Schiff, chairman of GW's genetics program is an art lover, and it's to the artistic aspect of buttons that he has devoted a book, Buttons: Art in Miniature, published in April.

It's hard to get Schiff to single out a favorite button among his collection of 12,000 which has been nearly 10 years in the making. A small circle of special ones, he admits, includes an 18th century Wedgwood mounted in steel, a gold button dating back to the 16th century which belonged to a Hungarian general and is decorated with opals, pearls, garnets and enamel work, a hand-carved ivory button and some painted porcelain ones.

Schiff was recently elected president of the Martha Washington Button Club in Washington. He estimates there are 30,000 button collector in the U.S. and says button collecting is the third largest collecting hobby behind coins and stamps. Winner of 13 awards in National Association of Button Collectors competition, Schiff received three first-place awards for his 18th century buttons, glass buttons and buttons depicting birds. He has acquired buttons from dealers, flea markets and antique shops, but he's not above asking if he can hunt through grandmother's old sewing box!

The enclosed photographs show Schiff and some of his buttons. He can be reached at 676-6090. If there is anything further I can do to assist you, please call me at 676-6464.

Sincerely,

Diane H. Rush

DISTRICT COURT JUDGE JOYCE HENS GREEN TO BE INTERVIEWED AT GW LUNCHEON

WASHINGTON, D.C.-- The Honorable Joyce Hens Green, judge of the U.S. District Court for the District of Columbia, will be interviewed at a GW National Law Center alumni and faculty luncheon at George Washington University on Tuesday, June 24. The luncheon will be held at noon in the third floor ballroom of the Marvin Center, 21st and H Streets, NW.

Judge Green, a 1951 graduate of the GW National Law Center, will be interviewed by Jacob Stein, president of the D.C. chapter of the George Washington Law Association and partner in the law firm Stein, Mitchell and Mezines.

Appointed to the District Court by President Carter in 1979, Judge Green has had a career distinguished by honors ranging from the Women's Legal Defense Fund first annual award for "Outstanding Contribution to Equal Rights" (1976), to "Woman Lawyer of the Year" awarded by the Women's Bar Association of the District of Columbia (1979). She is a member of several advisory boards and since 1977 has participated annually as a visiting professor of trial advocacy at the Harvard Law School.

GW PRESENTS MODEL, ADDITIONAL PLANS FOR 2000 PENNSYLVANIA AVENUE PROJECT

WASHINGTON, D.C. -- A team of architects and staff of the George Washington University vice president and treasurer's office detailed plans for the 2000 Pennsylvania Avenue project before Foggy Bottom-West End citizens on Tuesday, June 17. The project includes the northern half of a block fronting on Eye Street NW between 20th and 21st streets. It is scheduled for completion in 1983.

The presentation before Advisory Neighborhood Commission 2-A, Foggy Bottom Association and West End Citizens Association members included slides and schematics of each building level. It was the first time a model of the complex was available for comment by citizen groups.

Cost of the development is approximately \$40 million. The 400,000-square-foot site includes approximately 33,000 square feet of retail services. From five to eight eating establishments will take up about 15,500 square feet of the commercial area; the remainder is to be rented to other types of retail enterprises.

GW evaluated 21 proposals before signing an agreement for joint development of the complex with the Public School Employees' Retirement System of Pennsylvania. The venture, finalized in June, was negotiated by Walker & Dunlop working through the retirement fund's adviser, the Fidelity Bank, Philadelphia.

During the next few months the university will take the project before the D.C. Zoning Commission, the Joint Committee on Landmarks, the National Capital

TWO -- GW 2000 PENNSYLVANIA PROJECT

Planning Commission, and other city agencies. The complex will be a planned unit development (PUD), which permits the university some design flexibility in return for providing certain public benefits and amenities in the project.

The design as outlined at the June 17th meeting will require an alley closing and realignment, but will not restrict access to non-university owned properties on the block.

Details presented for the first time at the citizens' meeting included:

- three pedestrian entrances to the complex, on Eye Street, on 21st Street, and on 20th Street, and an interior "loop" of mezzanine walkways circulating among the interior retail space.

- two underground parking levels.

- 6,000 square feet of retail space at one level below grade (of the total of 33,000 square feet of commercial retail) reached by a staircase around a bay at the rear of one of the restored rowhouses.

- accommodations for bicycle and motorcycle parking

- a landscaped walkway on university-owned land from the rear of the office building south to H Street, connecting the complex to the university yard.

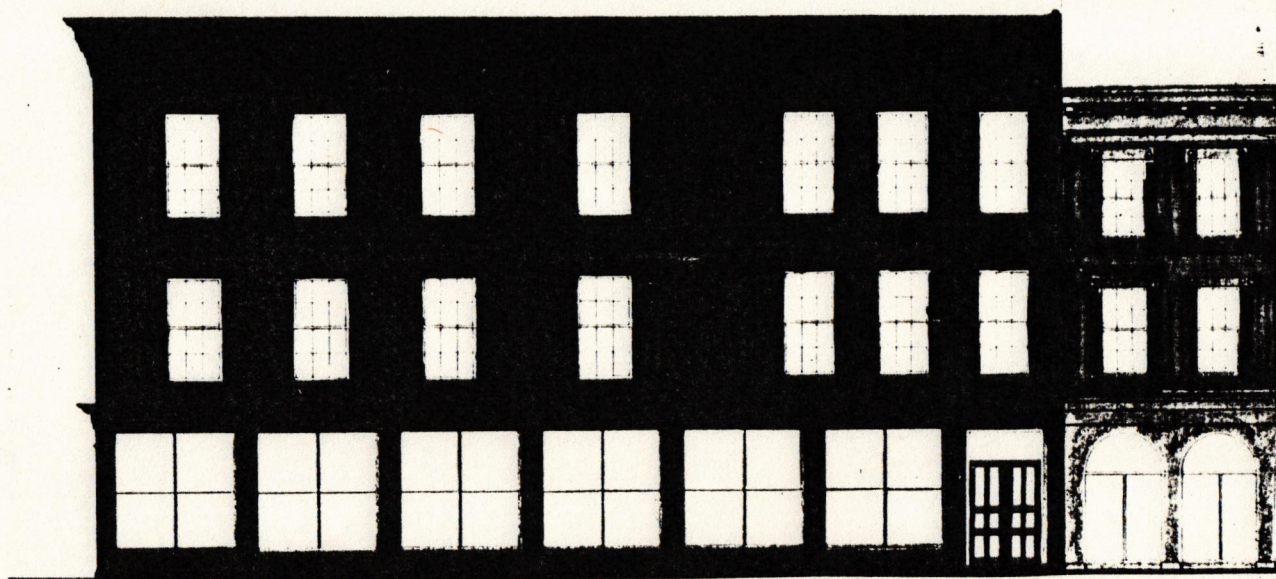

- three structural fill-ins in Red Lion Row gaps: an entrance to the office building lobby; the university gate, a separate entrance for university and community pedestrian traffic providing access through the development to H Street; and a fill-in of vacant space near the 21st Street side of the project.

- terraces at upper levels of the office building for plants.

- use of the restored Red Lion Row buildings for retail business at the ground levels.

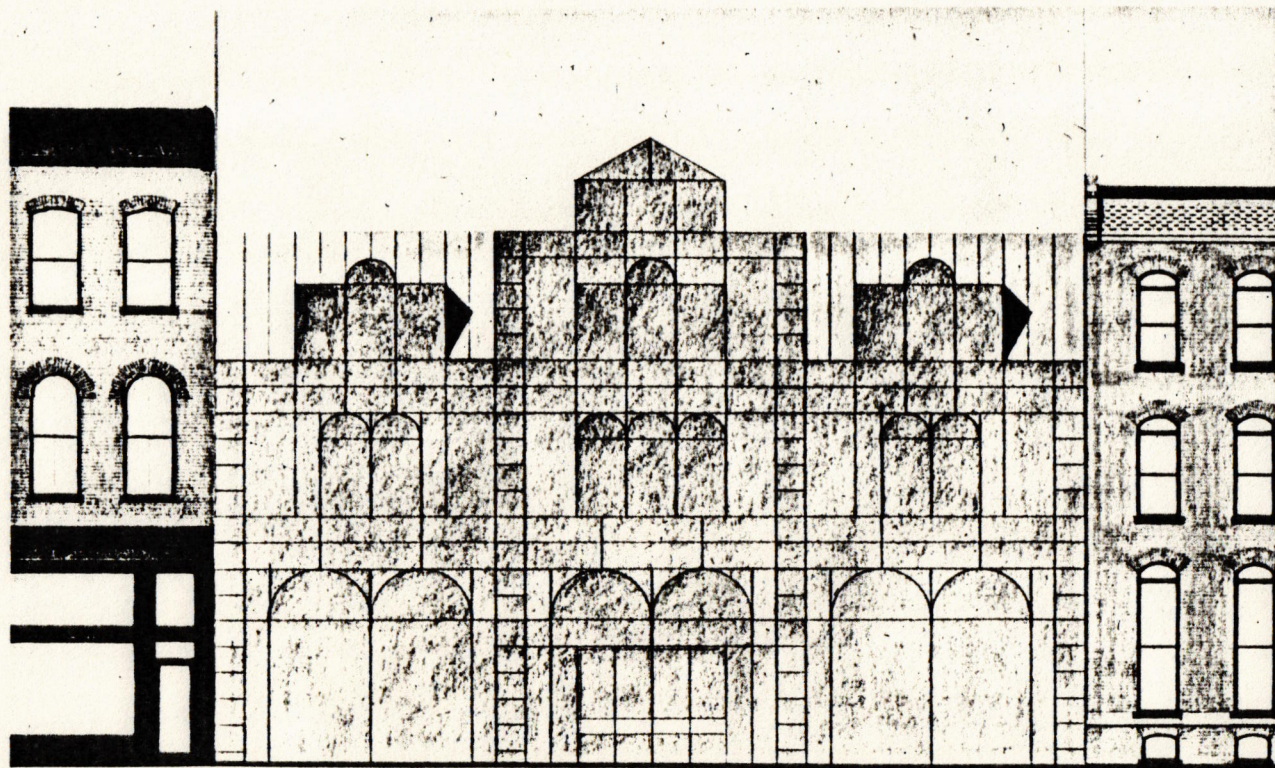

- use of a buff-colored brick as the construction material.

The development is the design of Hellmuth Obata Kassabaum/Warnecke Associated Architects.

Dear Ms. McCann:

Here is a picture of Larry Lubow, an artist from Fullerton California whose work is currently on exhibition in the George Washington University Dimock Gallery through July 18.

Here, also, is biographical information and a listing of awards and exhibitions which, I think, places him as an artist of national reputation.

I hope you will find it possible to make some use of the picture and the information in Artweek.

Sincerely,

Jane Lingo

FORMER WISCONSIN RESIDENT RECEIVES DEGREE AND AWARD -- David J. Steinhardt, center, son of Mr. and Mrs. Roy Steinhardt of Kresch Court, Kiel, Wisconsin, is shown with George Washington University President Lloyd H. Elliott, left, and fellow graduate Jonathan Fraade before the May 4 commencement exercises of the GW School of Government and Business Administration. Steinhardt received the degree of master of public administration and one of six George Washington awards presented this year. The awards were established in 1976 to recognize outstanding contributions in any area of the university. Steinhardt's award was for his efforts to integrate the GW public administration program with other Washington area academic and professional institutions. A graduate of the University of Wisconsin-Milwaukee in 1977 with a major in secondary education broad field of social studies and in history and a minor in political science, Steinhardt is now associated with the Office of Management and Budget's Office of Regulatory and Information Policy in the Presidential Management Internship Program.

UPPERVILLE RESIDENT RECEIVES HONORARY DEGREE

Edward F. Howrey, center, of Upperville, Va., poses with George Washington University Board Chairman Glen A. Wilkinson, left, and GW President Lloyd H. Elliott before the May 18 commencement exercises of the GW National Law Center when Howrey received the honorary degree of Doctor of Laws. The citation noted his innovative service as a government administrator (chairman of the Federal Trade Commission 1953 to 1955) and his formulation and molding of antitrust law and policy in both the public and private sectors. Howrey is a GW law alumnus, Juris Doctor with honors, 1927. The ceremony was held in the GW Charles E. Smith Center.

MEMO TO: TRAVEL & TOURISM EDITORS

FROM: ROBERT BOVÉ
(202) 676-6463 (OFFICE)
(703) 528-4791 (HOME)

A wide cross section of senior-level officials in business, labor and government has accepted invitation for membership on the George Washington University travel and tourism program advisory committee. A list of their names is attached, including Sen. Daniel K. Inouye (D-Hawaii), A. Russell Upshaw Jr., vice president, Central Division, Eastern Airlines, and Robert E. Juliano, legislative representative, Hotel and Restaurant Employees and Bartenders International Union, AFL-CIO.

GW's travel and tourism program emphasizes common aspects in the diverse tourist industry, such as travel agencies and airlines, and tourism destination development in such places as Washington, D.C. and Busch Gardens. It pays special attention to common areas in the field including marketing and promotion. Undergraduate, graduate and special studies are offered through the program.

The program is under continuous review and maintains close contact with industry and government employers to ensure program relevance and suitability to new and developing job opportunities. The advisory committee will meet twice a year, the first time in July, to review the program's progress and to provide guidance.

DR. ELIZABETH WEBB WILSON

WASHINGTON, D.C.--Dr. Elizabeth Webb Wilson, the first woman ever to be seated at an International Actuarial Congress in London (1927), a George Washington University graduate and former resident of Washington, D.C., died Saturday, June 21, at the Fairlawn Nursing Home in Lexington, Mass., of cardiac arrest. She was 85. She would have been 86 on July 25.

Born in Washington, D.C., in 1896, she lived with her parents, the late Dr. and Mrs. Lewes Delaware Wilson, at 316 B St., S.E. After graduating from Eastern High School in 1914, she entered George Washington University's Columbian College in the fall of that year. She received her B.A. with distinction from GW in 1917. She enrolled for graduate work but later withdrew due to her father's illness.

During World War I, she served as the head computer in the ballistics unit of the U.S. Army Ordnance Department. Dr. Wilson received her graduate degrees from Radcliffe College, M.A., 1920, and Ph.D., 1934. In 1924, she became an associate of the Actuarial Society of America. In 1943-44, she was an associate actuarial

mathematician, Social Security Board. Dr. Wilson was a member of the American Mathematical Society, the American Statistical Society, the American Economic Association, the Econometric Society and the Mt. Pellerin Society. At Radcliffe, she was made a Radcliffe Scholar.

In her long and distinguished career, Dr. Wilson was particularly concerned with the use of statistics to aid understanding of such problems as old age insurance, social security, public health programs and medical costs. In addition to her work as a mathematician and economist, Dr. Wilson was an author well known for her book, Compulsory Health Insurance (1947), published by the National Industrial Conference Board and for numerous articles in magazines and newspapers in opposition to socialized medicine.

Dr. Wilson served two years as president of the Columbian Women of George Washington University, a group which sponsors scholarships for deserving students. During her terms, membership doubled, scholarship funds were substantially increased and life memberships were instituted. In 1942, George Washington honored her with its Alumni Achievement Award.

Dr. Elmer Louis Kayser, university historian at GW, and a friend for 60 years, says of her, "She led a scholarly, rather than a public life . . . a person of very wide interests in the social sciences, conservative in view, and amazingly meticulous as a researcher. A woman of unusual drive, ahead of her time, she

devoted herself primarily to the public interest aspects of her field and in that she became known and respected both here and abroad."

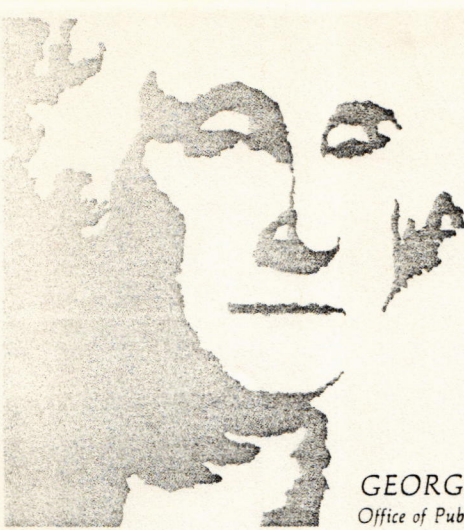

The 1917 GW yearbook, The Cherry Tree, read "Elizabeth is hidden gold and one does not have to dig far to become acquainted with her. She is noted for excelling in all lines of study and several of our 'profs' have given up the hope of teaching her any more."

In her later years, Dr. Wilson was a resident of Cambridge, Mass., and had entered Fairlawn Nursing Home in Lexington, Mass., in September, 1978.

In her will she provided for the establishment of two new clinics at George Washington University Medical Center: the first, in honor of her father and mother, the Dr. Lewes Delaware and Myrtie Hughes Wilson Clinic in Genetic Counseling; the second, in honor of two aunts, the Clara Louise and Mary Paul Wilson Clinic of Geriatrics.

Dr. Wilson never married and leaves no immediate survivors. Distant relatives live in the Rochester, N.Y., area.

There will be a memorial service for Dr. Wilson on Thursday, July 3, at 11 a.m. at Western Presbyterian Church, 1906 H St., N.W. Interment in Glenwood Cemetery will be private.

FOR IMMEDIATE RELEASE

GW STUDENT VOLUNTEER SERVICE ESCORTS SENIOR CITIZENS TO NATIONAL TOWN MEETING

WASHINGTON, D.C.--Because of a George Washington University student volunteer group called Students Travelling with Elderly People Service (S.T.E.P.S.) and a bus provided free by the D.C. Department of Recreation, nine older persons living at St. Mary's Court in Foggy Bottom were able to attend a National Town Meeting on "The Challenges of Aging in America" held recently in the Kennedy Center's Eisenhower Theater.

The service is one of only two such student projects in the nation, and the only one in the Washington area. S.T.E.P.S. is a new escort service for residents of St. Mary's Court, a HUD-subsidized housing complex for the low-income elderly, adjacent to GW's campus. Drawn from the GW student population, the volunteers provide the elderly with a variety of services, from direct physical assistance to help in shopping, banking and dealing with government agencies. This service is the first of its kind for both St. Mary's Court and GW. If successful, it may be made available to other areas in Washington.

-more-

page two of two

S.T.E.P.S., coordinated by 1980 GW graduate Jeff Nash, is available through GW's Community Projects in Aging (CPIA). According to CPIA Assistant Director Charles Picard, the project is funded by the National Council on Aging, Inc., and administered through the GW Division of Experimental Programs and the Center for Aging Studies and Services in the GW Medical Center.

For information call Jeff Nash at 676-7433 or Charles Picard at 676-2848.
